

Licensed Professional Institution of  
the Engineering Council

## **Members - your help is needed!**

Part one of **our planned paper on the history of the industrial gas turbine** will be presented to the Institution by IDGTE Council Member Ronald Hunt **late 2010/ early 2011**.

Ronald and his team have been able to gather a vast amount of information for this paper, which has been collated and organised by manufacturer.

However, they are still looking for high quality photos of the earlier gas turbines, seeking prints at least 8" x 10" in size, of a publishing quality for a display and each having a caption added.

The team will appreciate any contributions, which should be e-mailed or posted to the IDGTE office.
